Made with GAMMA

Problem Statement

Users frequently lose invoices and forget warranty deadlines, resulting in missed claims and financial loss.
An AI-based system is needed to store invoices, track warranties, and guide users before expiry.

Made with GAMMA

OUR SOLUTION

Objectives

Stores invoices digitally

Secure, searchable archive of proofs of purchase

Extracts data using OCR

Automatically reads product, date, and warranty length

Tracks warranty automatically

Dashboard shows active warranties and expiry dates

Sends reminders before expiry

Automated email & push alerts configurable per user

Suggests claim steps using AI

Step-by-step guidance for filing warranty claims

Shows service centers

Nearby authorized centers with contact and hours

Made with GAMMA

REAL-LIFE IMPACT

How It Works in Real Life

1. **Purchase Made**
   User buys a laptop. Receipt is printed or emailed.
2. **Invoice Uploaded**
   User scans/uploads invoice. OCR extracts product & warranty data automatically.
3. **Dashboard Updated**
   Warranty period tracked. Expiry date shown on clean dashboard.
4. **Reminder Triggered**
   30 days before expiry — push notification in webapp.
5. **Claim Filed ✅**
   User raises a service request in time. Money & product saved.

30
Day Advance Alert
Reminders sent before expiry

<2min
Onboarding Time
Upload invoice to active tracking

100%
Paperless
All documents stored digitally

Minimal
Manual Entry
OCR auto-fills all fields

TECH STACK

Full Stack Overview

🖥️ Frontend — Languages & Formats

TypeScript / TSX

Typed React components using .tsx files for safer, scalable UI code

HTML

index.html entry point for the single-page app

CSS + Tailwind

Base CSS with Tailwind utility classes for responsive, consistent styling

⚙️ Backend & Overall — Languages

TypeScript on Node.js

Server-side TypeScript runtime

Express.js for REST APIs

Lightweight HTTP server and routing

Supabase (PostgreSQL)

Managed Postgres with auth and realtime

Made with GAMMA

APIS & DATA LAYER

APIs Used & Data Storage

External APIs

Gemini

GEMINI_API_KEY — Primary LLM for NLU and text generation.

GROQ

GROQ_API_KEY — Fast embeddings for retrieval-augmented generation.

Storage & Secrets

Supabase (Postgres)

Primary relational DB for warranty records (product, purchase_date, expiry, status, user_id).

Firebase Admin SDK

Server-side auth verification and user identity; links to Supabase records.

Credentials

Store API keys and service tokens in a secrets manager; use environment variables and short-lived roles.

Made with GAMMA

PRODUCTION READINESS

Can This Work in Production?

Designed with scalable cloud architecture and secure storage for real-world usage.

✅ Horizontal Scalability

- Backend built using Node.js and Supabase.
- Database handles multiple users with cloud-based storage.

✅ Availability

- Supabase cloud database ensures reliable data storage.
- System can run continuously with minimal downtime.

✅ Security

- User authentication with secure login.
- Invoices stored safely in cloud storage with private access.
- No data shared without user permission.

✅ Performance

- Optimized frontend with React.
- Fast API calls using Supabase backend.

Made with GAMMA

🏆 BUSINESS VALUE

Business Value & Unique Selling Points

🏆 Our USPs

- **OCR-Powered Auto-Fill** — Reduces Manual Data Entry
- **AI chatbot** — instant warranty guidance, no googling
- **Proactive reminders** — not reactive like competitors
- **All-in-one** — store, track, remind, and chat in one app

📊 Competitor Comparison

Feature	Us	Samsung Members	JioSure / Manual
OCR Invoice Scan	✅	❌	❌
Multi-brand Support	✅	❌ Samsung only	⚠️ Limited
AI Chatbot	✅	❌	❌
Expiry Reminders	✅	⚠️ Basic	❌
Cloud Storage	✅	⚠️ Partial	❌

MARKET OPPORTUNITY

Market Opportunity

$3B+

Global Extended Warranty Market

Growing demand for digital warranty management solutions driven by increasing electronics & appliance purchases.

300M+

Potential Target Users

Smartphone & home appliance owners — students, families & small businesses.

60%+

Unclaimed Warranties

Consumers often miss claims due to lost invoices or forgotten expiry dates.

$2–3 /...

Potential Subscription Model

Premium features: unlimited warranties, AI-powered claim assistant, priority expiry alerts.

Revenue Streams

Freemium Model

Free: limited warranty storage. Premium: unlimited storage + AI assistant + smart alerts.

B2B Integration (Future Scope)

Warranty tracking API for e-commerce platforms, retail stores, and insurance partners.

Extended Warranty Partnerships (Future)

In-app recommendations for extended warranties — partner with insurers and retailers.

Made with GAMMA

FUTURE SCOPE

Future Scope

1 Mobile Application Launch

Develop Android & iOS app for real-time warranty tracking and instant notifications.

2 Smart Email & SMS Reminders

Automated expiry alerts via Email, SMS, and push notifications.

3 Auto Claim Submission

Direct warranty claim filing through integrated service portals.

4 Real-Time Service Center Integration

Location-based service center discovery using live APIs.

5 B2B Version for Retailers

Warranty tracking solution for electronics stores and e-commerce platforms.

6 AI-Based Risk Prediction

Predict product failure probability based on category trends and usage patterns.

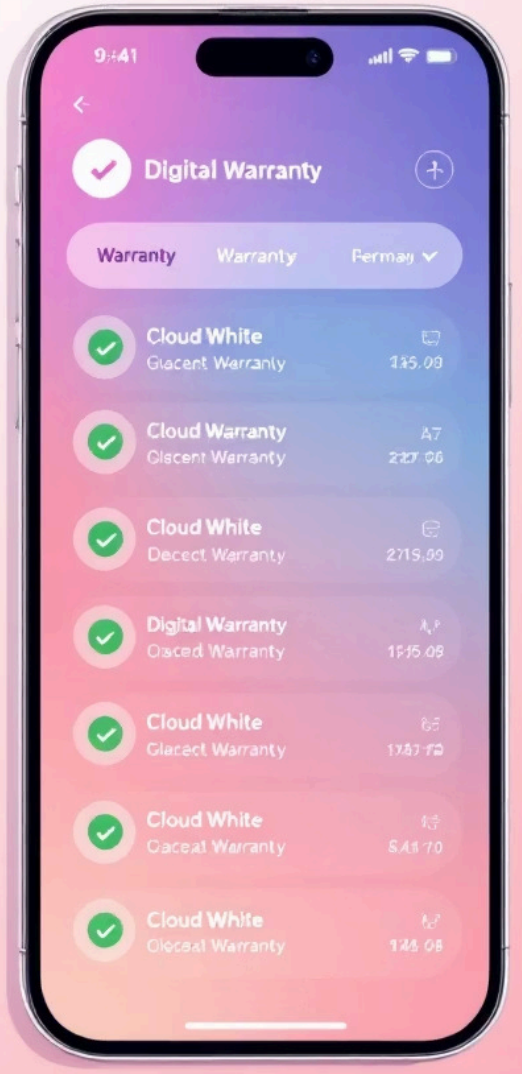
7 Cloud Sync & Multi-Device Access

Access warranties across multiple devices securely.

8 Extended Warranty Marketplace

In-app comparison and purchase of extended warranties.

Made with GAMMA



CONCLUSION

WARRIFY

Turning Lost Warranties Into Saved Money

🎯 Problem Solved

No more lost invoices. No more missed claims. One app handles everything.

⚙️ Built to Scale

Modern stack — React, Node, Supabase, OCR, AI — production-ready from day one.

💡 Real Impact

Addresses a $5B+ market gap with a smarter, AI-powered, all-in-one solution.

🏆 **Built at Hackathon 2026** — Warrify | AI-Powered Warranty Tracking PWA with OCR, Cloud Storage & Smart Reminders
